

*Good morning!*

*While the rest of the elves are busy making toys for the big day I thought you might help by testing one out. This balloon is two toys in one!*

*Put your hand on the balloon and swirl it around. The hex nut inside will roll around the balloon. The sound that you hear is the 6 pointy corners. Each time they hit the side of the balloon they start a vibration and vibrations are sound! What do you think would happen if I'd used a penny instead?*

*Now give the balloon a toss. Watch it wobble wobble as it flies through the air. Can you play catch with this crazy balloon? The hex nut inside doesn't stay in the middle. It slide around all over the balloon causing it to wobble, wobble and bobble as you try to figure out where it will go!*

*Stay good!*
